RETURNS AND ASSUMPTIONS – ADDITIONAL COMMENTS

Please use this text box to provide any additional information or commentary that may help clarify information provided in the previous form.

The 2021 and 2022 net returns are net of internal and external investment fees and expenses. Net returns prior to 2021 are net of external fees and expenses only.

Annual returns prior to 2020 are based on lagged accounting numbers and are the same as those reported in previous PRB 1000 reports.

TMRS claims compliance with Global Investment Performance Standards (GIPS®), with the TMRS Trust Fund examined and organization verified for 2021 and 2022. All valuations are in USD. GIPS® is a registered trademark of the CFA Institute. CFA Institute does not endorse or promote TMRS, nor does it warrant the accuracy or quality of the content contained herein. A copy of the GIPS Asset Owner Reports can be obtained by emailing invrisk@tmrs.com.

RETURNS AND ASSUMPTIONS – UNAVAILABLE INFORMATION

PRB-1000

Please list any unavailable information requested in this form in the text box below, including an explanation of why the information is unavailable. Completion of this form fulfills the requirements stated in Section 802.108 (c) of Texas Government Code.

☒ By marking this box, I certify that the information provided is accurate based on the methodology used; and that the retirement system for which this form is being provided agrees to a timely submission of the unavailable information if it becomes available.

CERTIFICATION

I certify that, as an official representative of the retirement system for which this report is being presented, I have the authority to provide the requested information, and that I have verified, to the best of my knowledge, that the information presented is complete, as far as indicated, and accurate. The following GIPS® Asset Owner Report is required for Texas Municipal Retirement System's compliance with the Global Investment Performance Standards (GIPS®). The GIPS® Asset Owner Report was not included with the PRB-1000 report submitted to the Texas Pension Review Board.

GIPS® Asset Owner Report

TMRS Trust Fund

Year	Total Trust Net Return (%)	Blended Benchmark Return (%)	Total Trust (Net) 3-Yr St Dev (%)	Blended Benchmark 3-Yr St Dev (%)	Number of Portfolios	Total Trust Assets (\$M)	Total Asset Owner Assets (\$M)
2022	-7.35%	-12.36%	N/A	N/A	264	\$35,456	\$35,456
2021	12.86%	12.23%	N/A	N/A	220	\$38,459	\$38,459

Texas Municipal Retirement System (TMRS) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. TMRS has been independently verified for the periods January 1, 2021 through December 31, 2022.

An asset owner that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the asset owner's policies and procedures related to total fund and composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on an asset owner-wide basis. The TMRS Total Trust has had a performance examination for the periods January 1, 2021 through December 31, 2022. The verification and performance examination reports are available upon request.

Texas Municipal Retirement System (TMRS or the System) was created by the Texas Legislature in 1947 and began operations in 1948 to provide retirement, disability, and death benefits for employees of Texas cities as directed by the TMRS Board of Trustees. TMRS investments are held in the TMRS Trust Fund for the exclusive benefit of the active and inactive members, retirees, and beneficiaries of the System.

The inception date of the TMRS Total Trust is January 1, 1989. The specific performance objectives include, but may not be limited to, the following:

- Achieve a total rate of return over rolling 5-year periods meeting or exceeding the Actuarial Return Assumption of 6.75%
- Exceed an appropriate benchmark reflective of asset class participation over rolling five-year periods (i.e., actual allocation index during the implementation period and Strategic Target Allocation Index once fully implemented).

External managers were utilized for all periods presented.

The Total Trust blended benchmark is calculated monthly using a blend of the asset class benchmarks based on the Total Trust's asset class weights. Each asset class uses a total return benchmark. Rollup of underlying manager benchmarks are rebalanced monthly using the weighted average returns of the benchmarks of all the underlying manager benchmarks in the asset class. The weights listed in the following table are as of December 31, 2022. Strategic targets and asset class underlying manager benchmarks and weights for prior periods are available upon request.

Asset Class	Description	Benchmark	Strategic Target 12/31/22	Asset Class Weight 12/31/22
Global Equity	The Global Public Equity allocation is intended to provide capital appreciation and is structured using both active and passive management, with the overall objective of exceeding its benchmark performance net of fees over rolling five-year periods. Passively Managed strategies will replicate broad market capitalization weighted indices.	MSCI All Country World Investable Market Index (Net)	35	33.0
Core Fixed Income	The Core Fixed Income allocation diversifies the risk of the overall investment portfolio with a secondary goal of capital preservation. The performance objective is to exceed its benchmark performance net of fees over rolling five-year periods. The portfolio is structured to include US Treasury, Government-Related, Corporates, Securitized (RMBS, CMBS, and ABS) investments, and municipal bonds, among other allowable investments.	Bloomberg Barclays US Aggregate Bond Index	6	5.1
Non-Core Fixed Income	The Non-Core Fixed Income allocation diversifies the risk of the overall investment program and is designed to provide both income and capital appreciation. The overall objective is to exceed its benchmark performance net of fees over rolling five-year periods. The portfolio is structured to include Global High Yield Debt, Loans/Direct Lending, Emerging Market Debt, Opportunistic Fixed Income, and Structured Credit.	Daily valued accounts: For period January 1, 2021 through June 30, 2021: Rollup of underlying Manager Benchmarks Beginning July 1, 2021: Bloomberg Barclays US Aggregate Bond Index + 1.50% Monthly valued accounts: For period January 1, 2021 through May 31, 2021: Rollup of underlying Manager Benchmarks Beginning June 1, 2021: Bloomberg Barclays US Aggregate Bond Index + 1.50% Quarterly valued accounts: For period January 1, 2021 through March 31, 2021: Rollup of underlying Manager Benchmarks Beginning April 1, 2021: Bloomberg Barclays US Aggregate Bond Index + 1.50%	20	19.1

TEXAS MUNICIPAL RETIREMENT SYSTEM

P.O. Box 149153 • Austin, Texas 78714-9153
800-924-8677 • www.tmrs.com

Asset Class	Description	Benchmark	Strategic Target 12/31/22	Asset Class Weight 12/31/22
Real Estate	The purpose of the real estate allocation is to enhance total return and provide diversification to the overall investment portfolio. The objective is to exceed its benchmark performance net of fees over rolling five-year periods. TMRS' allocation to real estate will be diversified among a variety of private and public market investment types by property type (e.g., multi-family, office, industrial, retail, etc.) and strategy (core, value-add, opportunistic) to maximize diversification benefits.	For period January 1, 2021 through March 31, 2021: NCREIF-ODCE Index Beginning April 1, 2021: NCREIF-ODCE Index (Net)	12	13.5
Other Public & Private Markets	The Other Public & Private Markets asset class is used for return enhancement, diversification, and inflation protection. The Other Public & Private Markets opportunity set includes, but is not limited to, the following: • GTAA / Global Macro • Inflation Linked Securities • Inflation Sensitive Equities • Commodities • Private Real Estate / REITS • Private / Listed Infrastructure • Natural Resources • Private Assets • Financing Strategies	Daily valued accounts: For period January 1, 2021 through June 30, 2021: Rollup of underlying Manager Benchmarks Beginning July 1, 2021: MSCI All Country World Investable Market Index (Net) Monthly valued accounts: For period January 1, 2021 through May 31, 2021: Rollup of underlying Manager Benchmarks Beginning June 1, 2021: MSCI All Country World Investable Market Index (Net) Quarterly valued accounts: For period January 1, 2021 through March 31, 2021: Rollup of underlying Manager Benchmarks Beginning April 1, 2021: MSCI All Country World Investable Market Index (Net)	12	11.9
Hedge Fund	The Hedge Fund portfolio includes strategies that provide both favorable stand-alone risk-adjusted returns as well as the benefit of diversification for the overall plan. Hedge Fund Managers can make investment which add value to portfolios by	For period January 1, 2021 through May 31, 2021: HFRI Fund of Funds: Diversified Index Beginning June 1, 2021:	5	6.3

Asset Class	Description	Benchmark	Strategic Target 12/31/22	Asset Class Weight 12/31/22
	achieving favorable risk-adjusted returns in most market environments while also reducing overall portfolio volatility. The list of strategies that the TMRS Hedge Fund portfolio may utilize includes, but is not limited to: • Equity Strategies • Event Driven • Credit Strategies • Relative Value: • Multi-Strategies: • Global Macro: and • CTA/Commodity/Currency	HFRI Asset Weighted Composite Index		
Private Equity	The Private Equity asset class is intended to enhance the total fund performance through investment in non-publicly traded securities by generating a long-term rate of return that exceeds that of publicly traded equities. Private equity investments are expected to be illiquid and long-term in nature. Private equity strategies generally include, but are not limited to, buy-outs in private companies, venture capital, growth oriented or minority equity investments; and special situations or opportunistic investments such as distressed securities and lending strategies, mezzanine and hybrid positions or other structured investments. The private equity market can be accessed using the primary market as well as secondaries and co-investments.	For period January 1, 2021 through March 31, 2021: Rollup of underlying Manager Benchmarks Beginning April 1, 2021: MSCI All Country World Investable Market Index (Net)	10	10.4
Cash Equivalents	Cash balances are generated for the purpose of satisfying cash flow requirements of the System, reallocating assets between portfolios, and from ordinary investment activity within a Manager's portfolio. The investment objective is to safeguard principal, maintain adequate liquidity to meet anticipated needs, and earn incremental yield. The performance objective is to exceed the return of the benchmark.	30 Day US Treasury Bills	0	0.6

The Total Trust performance is calculated monthly using time-weighted rates of return. Net returns are net of actual transaction costs, non-reclaimable withholding taxes on dividends, interest, and capital gains, fees and expenses related to externally managed pooled funds, fees from externally managed separate accounts, and investment

management costs. Investment management costs include investment personnel compensation, benefits, data valuation fees, consulting and legal services, investment research services, custody fees, and performance measurement and compliance services. As of December 31, 2022, 84% of Total Trust assets were valued using the NAV practical expedient. For some assets, preliminary, estimated values are used to determine fair value. Valuations are reported in USD. Policies for valuing investments, calculating performance, and preparing GIPS asset owner reports are available upon request.

The three-year annualized ex post standard deviation measures the variability of the Total Trust net returns and the blended benchmark returns for the 36-month period. The three-year annualized ex post standard deviation is not required when the Total Trust does not yet have a three-year GIPS-compliant track record.
